

Zurich Index UL Series

The Triple Index Story

Zurich Index UL™ and Zurich Survivor Index UL™
Flexible premium adjustable universal life insurance policies with index-linked interest options

Offered by Zurich American Life Insurance Company

The Power of Life Insurance with Innovative Interest Crediting Options

The Zurich Index UL Series provides:

- Diversity
- Hindsight
- Overweight
- Guarantee
- One Year Interest Lock
- Growth Cap

Zurich Index UL Series:

Zurich Index UL and Zurich Survivor Index UL

Maximize your Policy Values

The Zurich Index UL and Zurich Survivor Index UL provide you with the choice to allocate to any combination of our two fixed and three index interest crediting strategies. Importantly, you can change your strategies in the future as your needs change. The Fixed Interest Strategies use a declared rate of interest that is set periodically by Zurich American Life Insurance Company. The Indexed Interest Strategies calculate interest credits based on the movement of a market index or several indexes.

The Zurich Index UL Series EDGE

The Zurich Index UL Series EDGE is the power of triple index crediting with Hindsight and Overweight, which provides you with enhanced policy value growth potential.

The **Indexed Interest Strategies** offer the potential for policy value appreciation based on the performance of a well-regarded market index or indexes. The Zurich Index UL and Zurich Survivor Index UL offer you three Index Interest Accounts: the S&P 500® Index Interest Account, the Domestic Multi Index Interest Account and the Global Multi Index Interest Account. Each of these Accounts have a guaranteed annual fixed interest floor that protects against declines in the level of an index or indexes.

In addition to important 'downside protection', these index interest accounts offer potential 'upside' policy value growth based on the account's underlying market index or combination of several indexes. The accounts' index interest performance is determined on an annual basis, known as 'one year point-to-point'. Your policy values will annually be credited with index interest credits that are based on the calculated one year point-to-point performance of the account's indexes. Your policy values will receive 100% of the calculated index performance subject to a periodically declared maximum rate, known as a Current Growth Cap.

The Zurich Index UL Series' Indexed Interest Strategies:

Index Accounts	S&P 500® Index Interest Account	Domestic Multi Index Interest Account	Global Multi Index Interest Account
Description of Index/Indexes	Single index-based Account with performance tied to the S&P 500® Index ¹	Multi index Account with performance tied to the S&P 500® Index ¹ , Dow Jones-UBS Commodity Index ^{SM2} , and the Russell 2000® Index ³	Multi index Account with performance tied to the S&P 500® Index ¹ , MSCI EAFE Index ⁴ , and the MSCI Emerging Markets Index ⁴
Participation Rate	100%	100%	100%
Current Growth Cap	11.0%	10.0%	10.5%
Guaranteed Minimum Interest Rate	1% per year	0% per year	0% per year

The Zurich Index UL Series EDGE: the POWER of Triple Index crediting with Hindsight and Overweight

Consider these three well-known maxims:

'Don't put all of your eggs in one basket.'

'Hindsight is 20/20.'

'Accentuate the positive, minimize the negative.'

The Zurich Index UL Series EDGE is that two of the Indexed Interest Accounts – the Domestic Multi Index Interest Account and the Global Multi Index Interest Account – use three market indexes as opposed to a single market index as the basis of their annual index interest crediting. At the end of each account segment's one-year point-to-point period (hindsight), the three market indexes are ranked in order of annual performance and the following formula (overweight) is used in the index interest calculation:

- 70% of the highest index change rate, plus
- 30% of the next highest index change rate; plus
- 0% of the lowest index change rate.

The Account's policy value will be adjusted based on the above overweight calculation, subject to a periodically declared Current Growth Cap. The Current Growth Cap is applied after the overweight calculation, not to each separate index.

The powerful combination of these hindsight and overweight features has the potential to:

- Result in higher interest crediting rates than a single index crediting formula
- Reduce the volatility of index crediting over time
- Reduce your need to make frequent account allocation decisions

The Zurich Index UL Series EDGE:
the POWER of Triple Index crediting with Hindsight and Overweight

Domestic Multi Index Interest Account: the graph below examines the relative historical performance of each of the three indexes associated with the Domestic Multi Index Interest Account: the S&P 500® Index¹, the Dow Jones-UBS Commodity Index^{SM2}, and the Russell 2000® Index³. The graph indicates the percentage of time that each of the Account's indexes' annual performance ranked #1, #2 or #3.

Global Multi Index Interest Account: the graph below examines the relative historical performance of each of the three indexes associated with the Global Multi Index Interest Account: the S&P 500® Index¹, the MSCI EAFE Index⁴, and the MSCI Emerging Markets Index⁴. The graph indicates the percentage of time that each of the account's indexes' annual performance ranked #1, #2 or #3.

Ranked Five-Year Performance of the Three Indexes in the Domestic Multi Index Interest Account
(Over Period December 1991 – December 2011)*

Ranked Five-Year Performance of the Three Indexes in the Global Multi Index Interest Account
(Over Period December 1991 – December 2011)*

*The data represents the monthly closing values supplied by each of the index companies.

As you can see, both Accounts' hindsight and overweight crediting features reduce the need for you to predict which index or indexes will perform best.

The Zurich Index UL Series EDGE

You have choice in the life insurance you decide best meets your requirements. Why should you select the Zurich Index UL or Zurich Survivor Index UL? As we have previously outlined, the answer is based on a number of innovative policy provisions and how they work together in concert with one another to deliver to you a superior value proposition.

Let's review:

- **Diversity:** the Zurich Index UL's and Zurich Survivor Index UL's selection of Fixed Interest Strategies and Index Interest Strategies gives you the opportunity for geographic and economic diversity over time.
- **Hindsight:** the Domestic Multi Index Interest Account's and the Global Multi Index Interest Account's "Hindsight" feature eliminates the need for you to attempt to time the market and predict which market-based index will outperform other indexes. At the end of the year, the three market indexes will be ranked in order of performance.
- **Overweight:** the Domestic Multi Index Interest Account's and the Global Multi Index Interest Account's "Overweight" feature will automatically overweight the top performing index, underweight the #2 performing index and eliminate the #3 performing index from consideration. The combination of the "Hindsight" and "Overweight" features provides you the potential for outstanding annual interest crediting.
- **Guarantee:** all of the Zurich Index UL's and Zurich Survivor Index UL's Fixed Interest Strategies and Index Interest Strategies provide you with a guaranteed annual rate of interest crediting. These annual account guarantees ensure that the policy accounts you select will never be credited with a negative rate of interest at the end of any year.
- **One Year Interest Lock:** the S&P 500® Index Interest Account, the Domestic Multi Index Interest Account and the Global Multi Index Interest Account all credit index interest at the end of a twelve month period. This is important, because it ensures that your policy's Account segments will start each new year at a fresh starting point, fully reflective of last year's index performance.
- **Growth Cap:** importantly, the Domestic Multi Index Interest Account's and the Global Multi Index Interest Account's annual Growth Cap is applied AFTER the "Hindsight" and "Overweight" calculations have been performed. This helps to ensure that your policy FULLY benefits from the upside potential of the Zurich Index UL and Zurich Survivor Index UL accounts' innovative one-year point-to-point "Hindsight" and "Overweight" annual interest crediting.
